

*8<sup>th</sup> Annual*  
**Aircraft Records**

Thursday 16<sup>th</sup> May 2019  
Dublin, Ireland

*Platinum Sponsor*

*Associate Sponsor*

## AGENDA

**Moderator: TBC**

9.00 Registration

**9.30 Welcome Remarks**

*Panagiotis Panagopoulos, CEO & Founder, Aeropodium*

**Opening Remarks from the Moderator**

*TBC*

**9.40 PANEL DISCUSSION**

**Aircraft records: Why are they important and how can they be protected?**

- What is the purpose of technical records?
- Protecting your records

*Nick Godwin, Managing Director, Commsoft*

*Other Speakers to be confirmed*

10.40 Networking Coffee Break

**11.10 PANEL DISCUSSION**

**Preserving aircraft records**

- Managing aircraft records
- Meeting the requirements of operators
- Maintenance programs for airframe, engines, and APU and how to preserve aircraft value

*Speakers to be confirmed*

12.30 Networking Lunch Break Sponsored by

**13.50 PANEL DISCUSSION**

**Electronic records keeping and its advantages**

- Electronic technical logbooks
- The impact of blockchain on aircraft records
- ATA Spec 2500

*Speakers to be confirmed*

15.00 Networking Coffee Break

**15.30 PANEL DISCUSSION**

**Repossession and digitisation of aircraft records**

- Repossessing aircraft records
- Digitalization of aircraft records
- The importance of digital records

*Roland McKay, Aircraft Expert Witness, kayway.aero*

*Other Speakers to be confirmed*

## 16.30 Concluding Remarks

### SPONSORS

Drawing on its extensive experience in both the aviation and IT industries, Communications Software (Airline Systems) Ltd ('Commsoft') supports aircraft maintenance organisations with high quality, affordable MRO IT systems which increase efficiency and reduce costs in many key areas. The company's flagship product is the Open Aviation Strategic Engineering System (OASES). Utilising the latest technologies and an industry-leading database, OASES can be deployed easily and efficiently in any maintenance environment.

Headquartered in Tiptree, Essex, Commsoft has regional offices in Derby and Norwich and another close to Gatwick Airport as well as an office in Australia and support partners in India and Singapore.

#### OASES

OASES is a market-leading product which is used by over 50 airlines and maintenance organisations internationally, supporting over 80 aviation operations. An easy to use, functionally sophisticated system, OASES has been proven worldwide in a variety of live maintenance environments, from large LINUX systems to PC networks, and has formed the basis for maintenance and inventory processes that have received FAA, EASA and other local airworthiness authority approvals.

OASES has been designed in a modular fashion meaning that whilst any module can be used on a standalone basis, they can all talk to each other where necessary and form an integrated solution when used together. This integration means that data is only entered once and is made available to the other modules as necessary throughout the system. Individual modules can be implemented over project timescales, gradually adding functionality from each additional module to the whole project solution. This process gradually leads the client to a fully integrated OASES system and therefore a powerful, value-generating solution.

The flexibility of OASES means that Commsoft can offer excellent support to all organisations large or small, demonstrated by the fact that current customer fleets range from one to over fifty aircraft of all types.

In order to drive the development of the OASES programme, an OASES User Group meeting is held each year at which customer priorities are reviewed and discussed and representatives from our growing international client base are encouraged to offer feedback.

#### Commsoft services

**Implementation:** Commsoft believes that the key to any system is a professionally planned implementation that engages all key stakeholders, including local users.

**Training:** Flexibility is at the heart of Commsoft's training ethos. All organisations have differing needs, so Commsoft works to adapt to the client's particular learning requirements. In addition to formal training, there is an extensive on-line library of help-text available to all users via a single click of the mouse.

**Support:** Support and maintenance packages can be tailored to individual client requirements including provision of 24/7 assistance. As standard, Commsoft support packages include dedicated Help Desk support, remote analysis and fault finding, and a system modification release service.
